MESSAGE

It is a pleasure to know that the 15th World Rural Health Conference 2018 on the theme "Healing the Heart of Healthcare –Leaving No One Behind" is being organized during 26-29 April, 2018 at New Delhi.

Rural healthcare is one key sector which our Government has focused for holistic transformation to ensure the goal of 'Healthcare for All'. Access to quality healthcare should be the right of all and it is in this direction that our Government is institutionalizing the National Health Protection Scheme and strengthening the primary healthcare and support networks across rural India.

I hope that the World Conference at New Delhi will be a valuable platform for deliberating on a multi disciplinary approach to ensure the universal healthcare in rural areas leveraging the latest innovations and insights from across the globe.

Best wishes for successful Conference with tangible outcomes to improve the rural healthcare sector.

(Narendra Modi)
